320 Gymleco Incline Chest Press

300 series, Selectorized machines

The perfectly angled individual arms give a good feeling and natural movement that activates the upper chest muscles.

The machine provides a highly effective activation of the chest muscles and reduces the load on the ligaments and muscle brackets.

The feeling is the same as with free weights, but safer and of course perfectly stable.

- Standard frame color: Black
- Standard cushion color: Black / Red
- Weight block: 100 kg
- Larger weight block (optional)
- Inward long V-shaped movement.

Lenght	Width	Height	Weight
156 cm	122 cm	173 cm	226 kg

No maintenance needs.
